6. AI-Generated Summary Paragraph

The comparison identified 4 changed regions between the two images, affecting approximately 6.59% of the total image area. The most significant change is located in the bottom-right region (region #1), covering about 1.777% of the image. Additional changes were detected across the bottom-right, left, bottom and top-right areas of the frame. Overall, the modifications are classified as moderate in extent (structural similarity score: 0.9674). Confidence in these detections is moderate.
